

CHECKLIST

Splitting the bill at a Greek restaurant: before you go

- ☐ Decide your splitting method before ordering — equal split, separate bills, or one person pays.

- ☐ Tell the server early in the meal how you plan to pay so they can track orders accordingly.

- ☐ Ask for an itemised bill if you need to calculate individual shares or check what someone ordered.

- ☐ Use a phone calculator to divide costs fairly and confirm amounts with each person before payment.

- ☐ Flag any unfamiliar charges on the bill and ask the server to explain them.

- ☐ Settle up at the table before leaving so there's no lingering uncertainty about who paid what.

- ☐ If sharing many small plates, split those costs equally and add individual mains to each person's share.
